DECORATIVE STUCCO & COATINGS

Monobase BC Concentrate is a traditional European stucco scratch coat concentrated product with the unique benefits of vapor permeability, fiber reinforcement and water repellency - unmatched in the industry to accept a finish coat such as Sider-Plast Finish, MonoSideral, Sideral 2000, etc.

Monobase BC	
Item No.	Packaging
	One 45lb. Bag

MonoSideral is the traditional European hard coat stucco featuring the unique additional benefits of Water repellency & vapor permeability, 18 standard factory blended integral colors, Non-combustible & non-flammable which are not found in any other similar products on the market today. MonoSideral provides the natural solution when a consistently colored interior or exterior stucco wall finish is desired.

MonoSideral	
Item No.	Packaging
	One 66lb. Bag

Sideral 2000 Made with Crystal Fiber®, Sideral 2000 is the Next Generation hard coat decorative coating finish featuring the benefits of Vapor permeability & water repellency, Non-flammable & non-combustible, 18 standard factory blended integral colors and is made with the patented Crystal Fiber® technology. This technology creates a hard coat decorative coating finish that is light-weight and flexible, properties unparalleled in the decorative coating industry.

Sideral 2000	
Item No.	Packaging
	One 110lb kit contains 1-66lb bag of paste & 1-44lb bag of powder

Power Base is the ultimate traditional approach in exterior decorative finish systems specifically designed for insulated wall systems. The unique and revolutionary light-weight composition and reinforcing fibers of Power Base combined with the very specific integral color formulation of MonoSideral, yield a durable, fade resistant, colored "Old World" finish to be applied by hand troweling or spraying directly over insulated blocks, expanded or extruded polystyrene.

Power Base	
Item No.	Packaging
	One 55lb bag of powder in a 3-play paper bag with moisture barrier.

AVAILABLE IN 18 EARTH TONE COLORS

DECORATIVE STUCCO & COATINGS

Power-Base AAC is a durable polymer-modified interior or exterior leveling product for use over autoclaved aerated concrete and specifically designed for AAC Power Panels. Power-Base AAC performs like a protective skin that will not trap moisture. Use as a level coat for exterior or interior AAC surfaces. Non-shrink and allows application of finish coat in 24 hours (depending on ambient conditions).

Power-Base AAC	
Item No.	Packaging
	One 55lb bag of powder in a 3-play paper bag with moisture barrier.

Sider Base Concentrate is a cost saving alternative for an AAC base coat - A Concentrated Powder, add your own masonry sand and water at the site.

Sider Base Concentrate	
Item No.	Packaging
	One 55lb. Bag

Mono-base LW is a light-weight ready to use, base coat is easy to apply, renders a beautiful smooth finish to accept a finish coat such as Sider-Plast Finish, MonoSideral, Sideral 2000, etc.

Mono-base LW	
Item No.	Packaging
	One 66lb. Bag

Mono Sideral AAC is made with Crystal Fiber®, Sideral AAC provides the natural solution for a hard coat finish for Autoclaved Aerated Concrete (AAC) block and surfaces. Sideral AAC is an integrally colored, lightweight, flexible decorative coating that is water repellent and vapor permeable, and comes in 18 standard, factory blended integral colors that allow for a one-step application and prevents a "splotchy" color finished appearance.

Mono-Sideral AAC	
Item No.	Packaging
	One 110lb kit contains 1-66lb bag of paste & 1-44lb bag of powder

Sider GYP AAC is a ready-to-use, interior wall and ceiling gypsum plaster coating product. Simply mix with potable water and SiderGyp AAC is ready for application directly to Autoclaved Aerated Concrete (AAC) blocks, surfaces and gypsum board products. Use SiderGyp AAC is primarily applied on interior wall and ceiling areas to cover Autoclaved Aerated Concrete.

Sider GYP AAC	
Item No.	Packaging
	One 55lb. Bag

DECORATIVE STUCCO & COATINGS

Sider GYP is a one coat, interior wall and ceiling gypsum plaster coating product used to level and / or resurface walls and ceilings to accept Paint, Wallpaper, An additional coat of SiderGyp to create a textured finish and is the natural choice for wall repair and leveling. SiderGyp is primarily applied on interior wall and ceiling areas in a thickness ranging from 1/16" (1.6 mm) to 3/16" (5 mm).

Sider GYP	
Item No.	Packaging
	One 66lb. Bag

Power Base is the ultimate traditional approach in interior decoration finish systems specifically designed for insulated wall systems. The unique and revolutionary light-weight composition and reinforcing fibers of Power Base combined with the very specific integral color formulation of MonoSideral, yield a durable, fade resistant, colored "Old World" finish to be applied by hand troweling or spraying directly over insulated blocks, expanded or extruded polystyrene.

Item No.	Packaging
	One 55lb. Bag of powder in a 3-ply paper bag with moisture barrier

Oxy Cold is a non-chloride based, ready-to-use, concrete admixture designed to allow concrete placement in cold weather environments. Use OxyCold is especially useful for Increasing concrete cure rates in cold weather, Concrete mixes used for forming prefabricated concrete Limitations. Do not use with partially set or frozen concrete. Do not under or over use the correct mixture ratio of OxyCold with cement to achieve desired results.

Oxy Cold	
Item No.	Packaging
	5 Gallon (20 liter) pails 55 Gallon (210 liter) drums

Oxy Heat is a non-chloride based, ready to use concrete, masonry and mortar admixture designed to allow installation in hot weather environments.

Oxy Heat	
Item No.	Packaging
	1/2 Quart 5 Gallon pails 55 Gallon drums

Sider Resin is an exceptional bonding agent that is a white, aqueous copolymer synthetic resin emulsion for applications on walls or overhead applications. The unique plasticizing properties of SiderResin-M allow for maximum stabilization of the substrate and serves as the perfect bonding medium when resurfacing walls and overhead applications with such products as SiderWall-F, SiderWall-T, SiderRefit-F, SiderRefit-T and a variety of coating products.

Sider Resin
