

**SIDER****SIDERMOSS CLEANER
SIDERSEAL ROOF****OXYDRO****Description**

SiderMoss Cleaner is a ready-to-use, clear preventive and cleaning treatment against mildew and moss growth on concrete surfaces, tile, brick and stone. SiderSeal Roof is a clear sealant that provides additional protection against further moss or mildew growth.

**Use**

SiderMoss Cleaner is used to clean and prevent mildew or moss growth on all types of surfaces exposed to constant humid conditions such as tennis courts, stucco, stone or brick surfaces and all concrete surfaces. SiderSeal Roof is a clear sealant used to seal cleaned surfaces and provide additional protection against new moss or mildew growth.

Application Procedure*Cleaning*

Spray the surface to be treated using a hand sprayer at a ratio of 1 quart (1 liter) of SiderMoss Cleaner for a surface area of 40 to 50 ft^2 (4 to 5 m^2) and allow one week to set. Then, pressure-wash the surface or manually wash down the surface with a brush and water hose. Then follow preventive treatment procedures.

Preventive Treatment

Spray the surface to be treated using a hand sprayer at a ratio of 1 quart (1 liter) of SiderMoss Cleaner for a surface area of 50 to 80 ft^2 (5 to 8 m^2). Do not rinse. SiderMoss Cleaner will re-activate on its own during humid conditions. Treat only once a year.

For additional protection, apply one coat of SiderSeal Roof over the final coat of SiderMoss Cleaner.

Treat the surface during dry ambient conditions. Avoid treatment before or after rain. Avoid treatment during freezing temperatures or if temperatures exceed 90° F (32° C). Treat preferably during fall or spring season.

**Safety
Recommendations**

It is strongly recommended to wear rubber gloves and protective goggles during application of SiderMoss Cleaner. In case of contact with skin or eyes, rinse thoroughly with water. See manufacturer's Material Safety Data Sheet for additional information.

Packaging

5 gallons (18.9 liters) pail.
1 gallon (3.8 liters) containers comprised of 4 each 1 gallon containers.

Coverage

800 to 1500 ft^2 (80 to 150 m^2) per 20 gallons (18.9 liters) pail.
150 to 300 ft^2 (15 to 30 m^2) per 1 gallon (3.8 liters) container.

Storage and Shelf Life

Shelter in a dry environment from direct sunlight, extreme heat, rain and freezing. Shelf life is one year in original sealed packaging.

Sider-Oxydro products are specifically formulated and designed to meet and exceed industry standards. Please refer to technical data sheets for specific installation instructions or contact Sider-Oxydro for application questions.
