10' Lengths - Add suffix "WP" to order with weep holes; ex. STWP-2.					

● Application:

Can be used as a Starter Trac® or Casing Bead. Face return flange is 3/4" with striations which provide a strong physical bond for the base coat and perforations for bonding of the base to the substrate. Available with weep holes. Ideal for use where finished edge is exposed. 3" wide nailing flange also has striations for extra bonding.

Caulk all butt joints, intersections and ends.
It is recommended that PVC products be used for all exterior exposures.
