

SUBMITTAL: FX™ FIRE-RATED SECURITY/DETENTION FIRE EXTINGUISHER CABINETS

JL security and detention cabinets for fire extinguishers, fire hoses or fire department valves are constructed to meet maximum security requirements in areas where fire protection is required. All recessed models have heavy-duty masonry anchors welded to the frame.

Door & Trim: 12 gauge (0.27 cm) white powder-coated steel or 14 gauge #4 satin finish stainless door. Flush cabinet doors are mounted in a 5/8" door stop and attached by a heavy-duty continuous hinge.

Trim Style & Depth: 2" trim on frame. Available in *Recessed* with flat trim and *Semi-recessed* with 2-1/2" square trim

Tub: The double tub steel cabinets is constructed of 14 gauge cold rolled steel inside liner with white powder-coat finish standard. Fire-resistant material is sandwiched between the layers of steel. Heavy duty masonry anchors provided on recessed & semi recessed models

Lock Prep: Detention deadlock, detention slam lock or mortise cylinder. Select below.

Knockouts: Knockouts are not provided on Fire-Rated Cabinets. Instructions for Knockouts in the field are provided and must be strictly adhered to, to maintain fire rating.

Fire-Rating: The recessed and semi-recessed Fire-FX™ cabinets are fabricated in accordance with the Warnock Hersey label for one and two hour combustible and non-combustible wall system building codes. The fire testing has met the requirement of the UBC standard 43-6 and ASTM-E814-83 for membrane and penetration firestops. Installation instructions must be strictly adhered to in order to obtain the fire rating. The installation of any fire-rated cabinet which lacks a cabinet door or a condition in which the door is left ajar, will void the fire rating.

STEP 1: Select Door & Trim Materials From Chart on Page 2

[View Detention](#)

STEP 2: Select Lock Prep (Included in Price)

[Lock Options Here](#)

(DDP) Detention Deadlock Prep. (lock by others) Specify Type: _____

(DSP) Detention Slam Lock Prep. (lock by others) Specify Type: _____
